With a length of 33.8 metres, the A319-112 is one of the smallest aircraft in the Airbus family and is used by Austrian for destinations up to 3,000 km away. We fly you to Innsbruck, Sofia or Amman in Jordan with the A319. Destinations may change by season.

Learn your disability laws and rights, locate the right travel agent, protect your wheelchair when you travel, and be ready for the changes in security that affect the way you maneuver through airports. All this and much more is available in *Barrier-Free Travel*, the definitive guide to accessible travel for those who use a wheelchair, walker, cane, or who have other mobility limitations. And, back by popular demand, is a greatly expanded section on cruises, new material on children's travel issues, and global resources. Authored by the editor of *Emerging Horizons*, the leading travel magazine for people with disabilities, *Barrier-Free Travel* contains essential logistical information - not just common-sense tips. Because of the uncertainty involved in travel, people who need access accommodations need thoughtful, reliable information, and this one-of-a-kind book delivers it in a clear and engaging way.

Aircraft Propulsion and Gas Turbine Engines, Second Edition builds upon the success of the book 's first edition, with the addition of three major topic areas: Piston Engines with integrated propeller coverage; Pump Technologies; and Rocket Propulsion. The rocket propulsion section extends the text 's coverage so that both Aerospace and Aeronautical topics can be studied and compared. Numerous updates have been made to reflect the latest advances in turbine engines, fuels, and combustion. The text is now divided into three parts, the first two devoted to air breathing engines, and the third covering non-air breathing or rocket engines.

ICSSD 2002 is the second in the series of International Conferences on Structural Stability and Dynamics, which provides a forum for the exchange of ideas and experiences in structural stability and dynamics among academics, engineers, scientists and applied mathematicians. Held in the modern and vibrant city of Singapore, ICSSD 2002 provides a peep at the areas which experts on structural stability and dynamics will be occupied with in the near future. From the technical sessions, it is evident that well-known structural stability and dynamic theories and the computational tools have evolved to an even more advanced stage. Many delegates from diverse lands have contributed to the ICSSD 2002 proceedings, along with the participation of colleagues from the First Asian Workshop on Meshfree Methods and the International Workshop on Recent Advances in Experiments and Computations on Modeling of Heterogeneous Systems. Forming a valuable source for future reference, the proceedings contain 153 papers — including 3 keynote papers and 23 invited papers — contributed by authors from all over the world who are working in advanced multi-disciplinary areas of research in engineering. All these papers are peer-reviewed, with

excellent quality, and cover the topics of structural stability, structural dynamics, computational methods, wave propagation, nonlinear analysis, failure analysis, inverse problems, non-destructive evaluation, smart materials and structures, vibration control and seismic responses. The major features of the book are summarized as follows: a total of 153 papers are included with many of them presenting fresh ideas and new areas of research; all papers have been peer-reviewed and are grouped into sections for easy reference; wide coverage of research areas is provided and yet there is good linkage with the central topic of structural stability and dynamics; the methods discussed include those that are theoretical, analytical, computational, artificial, evolutionary and experimental; the applications range from civil to mechanical to geo-mechanical engineering, and even to bioengineering.

Textbook introducing the fundamentals of aircraft performance using industry standards and examples: bridging the gap between academia and industry Provides an extensive and detailed treatment of all segments of mission profile and overall aircraft performance Considers operating costs, safety, environmental and related systems issues Includes worked examples relating to current aircraft (Learjet 45, Tucano Turboprop Trainer, Advanced Jet Trainer and Airbus A320 types of aircraft) Suitable as a textbook for aircraft performance courses
