School refusal affects up to 5% of children and is a complex and stressful issue for the child, their family and school. The more time a child is away from school, the more difficult it is for the child to resume normal school life. If school refusal becomes an ongoing issue it can negatively impact the child's social and educational development. Psychologist Joanne Garfi spends most of her working life assisting parents, teachers, school counsellors, caseworkers, and community policing officers on how best to deal with school refusal. Now her experiences and expertise are available in this easy-to-read practical book. Overcoming School Refusal helps readers understand this complex issue by explaining exactly what school refusal is and provides them with a range of strategies they can use to assist children in returning to school. Areas covered include: • types of school refusers • why children refuse to go to school • symptoms • short term and long term consequences • accurate assessment • treatment options • what parents can do • what schools can do • dealing with anxious high achievers • how to help children on the autism spectrum with school refusal

Bully Nation is the most comprehensive analysis of bullying yet published. It is a brilliant book that refused to define bullying as merely a psychological concept. Instead, it addresses in great detail the interplay of bullying as having its roots in a range of historical, economic, political, and social conditions. In this instance, bullying functions as a metaphor to connect the private the public, specific acts of violence to larger forms of systemic violence. Rather than treat bullying as part of a rite of passage confined to the often difficult process of growing up, Derber and Magrass treat it as a systemic force that produces values, social relations, structures, and collective identities steeped in violence and aggression. This is a powerful and compelling book that addresses one of the most important social problems of our time.
