"The automotive maven and former Member of Parliament might be the most trusted man in Canada, an inverse relationship to the people he writes about." — The Globe and Mail Lemon-Aid shows car and truck buyers how to pick the cheapest and most reliable vehicles from the past 30 years of auto production. This brand-new edition of the bestselling guide contains updated information on secret service bulletins that can save you money. Phil describes sales and service scams, lists which vehicles are factory goofs, and sets out the prices you should pay. As Canada's automotive "Dr. Phil" for over 40 years, Edmonston pulls no punches. His Lemon-Aid is more potent and provocative than ever.

"From the editors of Old cars weekly"--Cover.

Phil Edmonston, Canada's automotive "Dr. Phil," pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation) Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while

underway Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that "killed" its own electric car more than a decade ago You can save \$2,000 by cutting freight fees and "administrative" charges Diesel annual urea fill-up scams can cost you \$300, including an \$80 "handling" charge for \$25 worth of urea Lemon-Aid's 2011-12 Endangered Species List: the Chinese Volvo, the Indian Jaguar and Land Rover, the Mercedes-Benz Smart Car, Mitsubishi, and Suzuki

Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. U.S. automakers are suddenly awash in profits, and South Koreans and Europeans have gained market shares, while Honda, Nissan, and Toyota have curtailed production following the 2011 tsunami in Japan. Shortages of Japanese new cars and supplier disruptions will likely push used car prices through the roof well into 2012, so what should a savvy buyer do? The all-new Lemon-Aid Used Cars and Trucks 2012-2013 has the answers, including: More vehicles rated, with some redesigned models that don't perform as well as previous iterations downrated. More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix as well as an updated list of the best and worst "beaters" on the market. More "secret" warranties taken from automaker internal service bulletins and memos than ever.

The future market forces and environmental considerations in the passenger car and commercial vehicle sector mean more stringent engine downsizing is far more prevalent. Therefore, novel systems are required to provide boosting solutions including hybrid, electric-motor and exhaust waste energy recovery systems for high efficiency, response, reliability, durability and compactness. The current emission legislations and environmental trends for reducing CO2 and fuel consumption are the major market forces in the land and marine transport industries. The internal combustion engine is the key product and downsizing, efficiency and economy are the driving forces for development for both spark ignition (SI) and compression ignition (CI) engines in both markets. Future market forces and environmental considerations for transportation, specifically in the passenger car, commercial vehicle and the marine sectors mean more stringent engine downsizing. This international conference is the latest in the highly successful and prestigious series held regularly since 1978. These proceedings from the Institution OCOs highly successful and prestigious series address current and novel aspects of turbocharging systems design, boosting solutions for engine downsizing and improvements in efficiency, and present the latest research and development in this growing and innovative area. Focuses on boosting solutions including hybrid, electric-motor and exhaust waste energy recovery systems Explores the current need for high efficiency, reliability, durability and compactness in recovery systems Examines what new systems developments are underway"

As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality-control problems, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz -- rich cars, poor quality. There's only one Saturn you should buy. Toyota -- enough apologies: "when you mess up, fess up."

Studienarbeit aus dem Jahr 2011 im Fachbereich BWL - Allgemeines, Note: 1,3, Universität Hohenheim, Sprache: Deutsch, Abstract: Eine glaubwürdige und stabile Unternehmensidentität schafft Wettbewerbsvorteile, denn sie versteht sich als Übereinstimmung mit sich selbst und gibt Mitarbeitern wie Kunden Sicherheit. Das über die Jahre entstehende Selbstverständnis eines Unternehmens entwickelt und festigt sich zunächst durch die Realisierung der zu erfüllenden Aufgaben, welche jedoch eng in Verbindung mit der Berücksichtigung der Austauschbeziehungen stehen. Dabei kommt dem Kommunikationsmanagement eine wichtige Rolle zu: die Identität soll den Stakeholdern über Kommunikation vermittelt werden. Demzufolge ist erst durch soziale Interaktion mit der Öffentlichkeit eine Entwicklung der Unternehmensidentität möglich. Das Unternehmen erwirbt somit ein Gesicht bzw. eine Persönlichkeit und hat die Möglichkeit zur Selbstdarstellung - die Philosophie, Zielsetzungen und das angestrebte Soll-Image des Unternehmens kommen zum Ausdruck. Allgemein ist es für den Aufbau langfristiger Beziehungen zu den Stakeholdern von Relevanz öffentliche Wertansprüche nachzuvollziehen (Empathie), sie in das Handeln und Auftreten des Managements zu integrieren und eine Balance zwischen Selbstverständnis bzw. Eigenidentität und dem gesellschaftlichen Wertewandel herzustellen. Wertsubstanzen aus der Vergangenheit, Gegenwart und Zukunft sollen sich weitgehend decken (Kontinuität). Zudem sollen vergangene widersprüchliche Ereignisse oder Handlungen beseitigt z.B. Kooperationen mit dem NS-Regime, Sklavenarbeit etc. und Interessen sowie Erwartungen der Stakeholder berücksichtigt werden (Konsistenz). Eine klare Identität bietet verschiedene Differenzierungspotenziale. Das Unternehmen kann sich nach außen hin abgrenzen, da die Identität nach innen stabilisierend wirkt. Identität versteht sich also als Klammer, die das Unternehmen zu einer Einheit führt.
