Migrate to Intent-Based Networking and improve network manageability, cost, agility, security, and simplicity With Intent-Based Networking (IBN), you can create networks that capture and automatically activate business intent, assure that your network responds properly, proactively detect and contain security threats, and remedy network issues before users even notice. Intent-Based Networking makes networks far more valuable, but few organizations have the luxury of building them from the ground up. In this book, leading expert Pieter-Jans Nefkens presents a unique four-phase approach to preparing and transforming campus network infrastructures, architectures, and organization helping you gain maximum value from IBN with minimum disruption and cost. Media Flight Plan was developed in response to the need for affordable media planning simulations in the university classroom. Professional level media planning software ranges in price from hundreds to thousands of dollars. Media Flight Plan, including both the textbook and the online simulation, sells at or below the average price of a used textbook. MFP provides university students' access to not only realistic simulations of planning software, but also includes access to professional syndicated data like

MRI, SRDS, Nielsen data, (all by permission) and other syndicated sources that only large corporations and agencies can afford. Besides the online software simulation, the text includes eight chapters that cover basics like basic math models involved in media buying/planning, and exercises that cover calculation of audience ratings, media share, reach and frequency, and gross rating points. Case studies are included for actual Fortune 500 clients. All cases require students to interpret and apply professional syndicated data and employ the basic methods for writing marketing driven media plans. Both authors, Dennis Martin and Dale Coons, have professional ad agency experience. Coons is executive vice president in a major agency where he directs research, media planning and client development. He is among the most sought-after experts in the field of advertising research. Martin worked on national brands as a copywriter and creative director and co-authored Strategic Advertising Campaigns, a national best-seller for Advertising Age's publishing division. Earning his Ph.D. at University of Illinois, he achieved national and international recognition as a professor of marketing communications.
