This new volume is the first to focus entirely on automated essay scoring and evaluation. It is intended to provide a comprehensive overview of the evolution and state-of-the-art of automated essay scoring and evaluation technology across several disciplines, including education, testing and measurement, cognitive science, computer science, and computational linguistics. The development of this technology has led to many questions and concerns. Automated Essay Scoring attempts to address some of these questions including: *How can automated scoring and evaluation supplement classroom instruction? *How does the technology actually work? *Can it improve students' writing? *How reliable is the technology? *How can these computing methods be used to develop evaluation tools? *What are the

state-of the-art essay evaluation technologies and automated scoring systems? Divided into four parts, the first part reviews the teaching of writing and how computers can contribute to it. Part II analyzes actual automated essay scorers including e-raterTM, Intellimetric, and the Intelligent Essay Assessor. The third part analyzes related psychometric issues, and the final part reviews innovations in the field. This book is ideal for researchers and advanced students interested in automated essay scoring from the fields of testing and measurement, education, cognitive science, language, and computational linguistics.

Written by one of the leading authorities on trade and finance in the early modern Atlantic world, these fourteen

essays, revised and integrated for this volume, share as their common theme the development of the Atlantic economy, especially British America and the Caribbean. Topics treated range from early attempts in medieval England to measure the carrying capacity of ships, through the advent in Renaissance Italy and England of business newspapers that reported on the traffic of ships, cargoes and market prices, to the state of the economy of France over the two hundred years before the French Revolution and of the British West Indies between 1760 and 1790. Included is the story of Thomas Irving who challenged and thwarted the likes of John Hancock, Samuel Adams, Alexander Hamilton, George Washington and Thomas Jefferson.

This volume takes a multidisciplinary perspective on generalization of knowledge from several fields associated with Cognitive Science, including Cognitive Neuroscience, Computer Science, Education, Linguistics, Developmental Science, and Speech, Language and Hearing Sciences. The aim is to derive general principles from triangulation across different disciplines and approaches.

THE SUNDANCE WRITER, Brief Fifth Edition, provides students with essential skills needed for writing in college and beyond, including critical thinking and reading, as well as writing for academic and workplace audiences. The fifth edition features an important restructuring of content that allows students to proceed more quickly to writing projects
