A Practical Guide to Piping and Valves for the Oil and Gas Industry covers how to select, test and maintain the right oil and gas valve. Each chapter focuses on a specific type of valve with a built-in structured table on valve selection. Covering both onshore and offshore projects, the book also gives an introduction to the most common types of corrosion in the oil and gas industry, including CO₂, H₂S, pitting, crevice, and more. A model to evaluate CO₂ corrosion rate on carbon steel piping is introduced, along with discussions on bulk piping components, including fittings, gaskets, piping and flanges. Rounding out with chapters devoted to valve preservation to protect against harmful environments and factory acceptance testing, this book gives engineers and managers a much-needed tool to better understand today ' s valve technology. Presents oil and gas examples and challenges relating to valves, including many illustrations from valves in different stages of projects Helps readers understand valve materials, testing, actuation, packing and preservation, also including a new model to evaluate CO₂ corrosion rates on carbon steel piping Presents structured valve selection tables in each chapter to help readers pick the right valve for the right project

Eugene is remembering the summer of 1938 in Frenchtown, a time when he began to wonder " what I was doing here on the planet Earth. " Here in vibrant, exquisite detail are his lovely mother, his aunts and uncles, cousins and friends, and especially his beloved, enigmatic father. Here, too, is the world of a mill town: the boys swimming in a brook that is red or purple or green, depending on the dyes dumped that day by the comb shop; the visit of the ice man; and the boys ' trips to the cemetery or the forbidden railroad tracks. And here also is a darker world—the mystery of a girl murdered years before. Robert Cormier ' s touching, funny, melancholy chronicle of a vanished world celebrates a son ' s connection to his father and human relationships that are timeless.
