Isuzu takes pride in the technical expertise that ensures the Isuzu product is the best in the marketplace. Isuzu is confident of the results its engine will produce, whether it is on an irrigation field, powering your rental fleet, providing backup power for a hospital, or even generating power in the deep freeze. ...

Krause Publications' Standard Catalog series is available by specific marque, in individual volumes or a set. Each book contains in-depth profiles of specific makes by model, factory photos, and up-to-date vehicle pricing. The l-to-conditional pricing system assures readers of accurate values, whether a vehicle is a #1 low-mileage, rust-free beauty or a #6 parts-only heap. "Techs & specs", original factory prices, production and serial numbers, and engine/chassis codes are noted by model, thus helping you determine authenticity accuracy. Historical, technical and pricing information are combined from hundreds of sources. James Flammang values each model according to the popular 1-6 grading system invented by Old Cars magazine.

Provides extensive information on state-of the art diesel fuel injection technology.

The new beautifully written and utterly compelling psychological crime thriller from number 1 Swedish bestselling sisters Sometimes reliving the past revives old demons . . . In a Stockholm apartment, five-year-old Tilde watches from under the kitchen table as her mother is brutally kicked to death. Meanwhile, in another part of town, psychotherapist Siri Bergman and her colleague Aina meet their new patients - a group of women, all of whom are victims of domestic violence. From Kattis, who was beaten by her boyfriend and lives under the constant threat of his return, to Malin, the promising young athlete who was attacked by a man she met online, and from Sofi, the teenager abused by her stepfather, to Sirkka, an older woman who had a troubled marriage - each woman takes her turn to share her story in the safety of the sessions. But as the group gets closer, it is not long before the dangers lurking in the women's lives outside invade the peace with shattering consequences. And somehow, the fate of five-year-old Tilde is intertwined with that of Siri and the other women, so that what started out as the search for peace will swiftly turn into a tense hunt for a murderer. Praise for Camilla Grebe and Åsa Träff: 'Grebe and Träff break new ground in the Scandinavian crime literature genre, and they do it brilliantly. Using unique insights and experiences from their own professional backgrounds, they tell a smooth-paced yet utterly intriguing story about man's inability to let go of the past' Kristina Ohlsson, author of Unwanted

Blank book to complete for all your gluten free recipes in one place. Handy box to list your ingredients and lines to write your method. Glossy cover to protect your book.

Celebrity Rehab star and Thelonious Monster frontman Bob Forrest's memoir about his drug-fueled life in the L.A. indie rock scene of the '80s and '90s and his life-changing decision to become a drug counselor who specializes in reaching the unreachable. Life has been one strange trip for Bob Forrest. He started out as a suburban teenage drunkard from the Southern California suburbs and went on to become a member of a hip Hollywood crowd that included the Red Hot Chili Peppers, Johnny Depp, and River Phoenix. Los Angeles was their playground, and they hung out in such infamous haunts as the Viper Room and the Whisky a Go Go. Always one to push things to their limit, Bob partied the hardest and could usually be found at the center of the drama. Drugs weren't Bob's only passion. He was also a talented musician who commanded the stage as the wild and unpredictable lead singer of Thelonious Monster. They traveled the world, and their future seemed bright and wide open. But Bob's demons grew stronger as he achieved more success and he sank deeper into his chemical dependency, which included alcohol, crack, and heroin habits. No matter how many times he went to rehab, sobriety just wouldn't stick for him. Soon he saw his once-promising music career slip away entirely. Eventually Bob found a way to defeat his addiction, and once he did, he saw the opportunity to help other hopeless cases by becoming a certified drug counselor. He's helped addicts from all walks of life, often employing methods that are very much at odds with the traditional rehab approach. Running with Monsters is an electrifying chronicle of the LA rock scene of the 1980s and '90s, the story of a man who survived and triumphed over his demons, and a controversial perspective on the rehab industry and what it really takes to beat addiction. Bob tells his story with unflinching honesty and hard-won perspective, making this a reading experience that shocks, entertains, and ultimately inspires.

This much anticipated collection of stories, written by Oxford University Fellow and Pain Scientist, Dr GL Moseley, provides an entertaining and informative way to understand modern pain biology. Described by critics as 'a gem' and by clinicians as 'entertaining and educative', Painful Yarns is a unique book. The stories, some of his travels in outback Australia, some of experiences growing up, are great yarns. At the end of each story, there is a section "so what has this got to do with pain?" in which Lorimer uses the story as a metaphor for some aspect of pain biology. The level of the pain education is appropriate for patients and health professionals. The entertainment is good for everyone. You don't have to be interested in pain to get something from this book and a laugh or two!

This book presents the papers from the latest conference in this successful series on fuel injection systems for internal combustion engines. It is vital for the automotive industry to continue to meet the demands of the modern environmental agenda. In order to excel, manufacturers must research and develop fuel systems that guarantee the best engine performance, ensuring minimal emissions and maximum profit. The papers from this unique conference focus on the latest technology for state-of-the-art system design, characterisation, measurement, and modelling, addressing all technological aspects of diesel and gasoline fuel injection systems. Topics range from fundamental fuel spray theory, component design, to effects on engine performance, fuel economy and emissions. Presents the papers from the IMechE conference on fuel injection systems for internal combustion engines Papers focus on the latest technology for state-of-the-art system design, characterisation, measurement and modelling; addressing all technological aspects of diesel and gasoline fuel injection systems Topics range from fundamental fuel spray theory and component design to effects on engine performance, fuel economy and emissions
