In this classic resource, pre-service and new teachers get well-developed approaches to teaching, grounded in research and experience and designed to ensure the high levels of learning they are intended to generate. With the goal of providing the strongest positive effect on student achievement while keeping in line with the current emphasis on standards-based education, "Models of Teaching" pairs rationale and research with real-world examples and applications to provide a strong foundation for future and new educators. The book encompasses all of the major psychological and philosophical approaches to teaching and schooling, includes thoroughly documented research on the various models of teaching and their subsequent positive effects on student success, and gives teachers the tools they need to build strong classrooms that accelerate student learning. NEW! Discussions of research relevant to each model are woven into the text. NEW! Advice from the authors about teaching and the use of the models of teaching is provided in links throughout the Pearson eText. NEW! A PowerPoint outline for instructors supplements the print material. NEW! An extensive Instructor's Manual (with links throughout) helps instructors plan and present courses and workshops, and serves as a study guide for students in mastering the text and applying the models in the classroom. Multimedia materials support learning of the models 25 video demonstrations of the models in action are available at www.modelsofteaching.org. Support for incorporating the new Common Core Standards: Each model is described in relation to the relevant standards.

With the goal of providing the strongest positive effect on student achievement while keeping in line with the current emphasis on standards-based education, Models of Teaching pairs rationale and research with real-world examples and applications to provide a strong foundation for future and new educators. It includes thoroughly documented research on the various models of teaching and their subsequent positive effects on student success. Serving as the core of a successful K-12 teacher education program, Models of Teaching encompasses all of the major psychological and philosophical approaches to teaching and schooling, and gives teachers the tools they need to build strong classrooms that accelerate student learning.

Provides a collection of teaching models that can be incorporated into a curriculum.

With this Eighth Edition, The Musical Classroom celebrates thirty years as a leading resource for future and in-service teachers as they engage children in the exciting world of music! Teachers, with the help of this user-friendly text, can develop the understandings and skills needed to teach elementary school music. The forty-four model lessons are the centerpiece to the book's long-lasting success. A collection of over 170 children's songs from around the world; instructional information for learning to play the recorder, keyboard, guitar, and Autoharp(TM); and the theoretical, pedagogical, and practical backgrounds needed for reaching all learners complete the comprehensive resource of The Musical Classroom. Note: This is the standalone book. If you want the accompanying audio CD, order the ISBN 9781138656703, which is available for separate sale.

This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. Models of Teaching: The Heart of the Core gives readers well-developed approaches to teaching, grounded in research and experience and designed to ensure the high levels of learning they are intended to generate. With the goal of providing the strongest positive effect on student achievement while keeping in line with the current emphasis on standards-based education, Models of Teaching pairs rationale and research with real-world examples and applications to provide a strong foundation for future and new educators. The book encompasses all of the major psychological and philosophical approaches to teaching and schooling, includes thoroughly documented research on the various models of teaching and their subsequent positive effects on student success, and gives teachers the tools they need to build strong classrooms that accelerate student learning. This new edition features 25 video demonstrations of the models in action and describes each model in relation to the relevant Common Core Standards.

Previous editions have Peter Oliva as only author.

This easy-to-use guide introduces many proven models, strategies, examples, and methods to new generations of educators, emphasizing the essentials of good teaching.

There has been an evolution of the explanations on the results of research on human learning and how digital technologies have supported the design of more efficient learning environments. Previous theories such as Richard Mayer's cognitive theory of multimedia learning and John Sweller's cognitive load theory have gained significant attention and remain the two main theories within the multimedia learning field. However, there has not yet been a book compiled of several investigations on the specific 4C-ID model that covers different domains of knowledge. The 4C-ID model combines the two main theories of Richard Mayer and John Sweller to advance the field of learning and instruction. 4C-ID Model and Cognitive Approaches to Instructional Design and Technology: Emerging Research and Opportunities explores the behavioral and constructivist approaches to learning and instruction and focuses mainly on the particular cognitive approach and resulting theories and insights of the 4C-ID model. The chapters present the results of three experimental studies applied to the teaching of electrical circuits, initiation to computer programming using the Alice microworld, and computer programming using Python textual language. This book is a valuable resource tool for computer programmers, computer scientists, teachers, educational psychologists, practitioners, researchers, academicians, and students interested in the various approaches to learning and instruction in terms of the 4C-ID instructional model.

Where To Download Models Of Teaching 9th Edition

This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. Solidly grounded in current recommendations of the National Science Education Standards, this text offers teaching guidance and strategies for physical, biological, and earth science courses for middle school, junior high, and high school. The authors' extensive curriculum development experience imbues the text with a practical focus. Their collective knowledge of the field balances coverage of the theory and research behind the strategies they present. Also, inherent in the text is a description of the role of constructivism in science teaching and the connection between science and society including how technological development is driven by societal needs.
