Philosophers of quantum mechanics have generally addressed exceedingly simple systems. Laura Ruetsche offers a much-needed study of the interpretation of more complicated systems, and an underexplored family of physical theories, such as quantum field theory and quantum statistical mechanics, showing why they repay philosophical attention.

World traveling fingerstyle guitarist Pat Kirtley presents 17 solo guitar arrangements of traditional Irish tunes including a few original compositions in the same vein by himself, Pierre Bensusan, and Duck Baker. As all of the tunes in this 1997 recording were arranged in altered tunings (DADGAD, EADEAE or DADEAD), each appears in both standard notation and tablature with insightful performance notes. In general, these transcriptions from Pat Kirtley's 1997 album of the same title are extremely accurate; the Red-Haired Boy, however, played as a duet with Steve Rector on the album - appears as a solo arrangement in this book. Recommended for the intermediate to advanced player, the author provides insightful performance notes for each tune.

This wonderful project focuses on the use of chord shapes (mainly triads) in building a single line solo. It also opens up some of the mystery of the fretboard by showing exactly how the fretboard relates to diatonic harmony without using single note scales. Not only will new lines appear easier, but new and usable chord voicings will also appear. These chords will be related to the lines being played. It also will help move away from position playing and open up the neck, removing any black holes. There is also a look at phrasing and how rhythmic understanding is important to the improving harmonic and melodic development. Companion CD included.

Drawing on advances in neurophysiology, psychology, music theory, and philosophy, the author explores the connections humans form with music and the physical and mental reactions music produces in us
