The neoBLUE ® compact LED Phototherapy System provides the right light in the right configuration that you're looking for. The sleek designed system can be used independently or attached without tools to a pole mount, the compact size of this system provides the needed surface area coverage when exposing a newborn's skin during LED therapy.

This Spiral® Manual provides a practical approach to the diagnosis and medical management of newborns. Chapters cover maternal, fetal, and neonatal problems and common neonatal procedures. An outline format provides quick access to a large amount of information, and the outline headings are standardized in this edition. The updated coverage includes new information on fetal assessment, survival of premature infants, and perinatal asphyxia and new guidelines on neonatal jaundice. The popular appendices include effects of maternal drugs on the fetus, maternal medications during lactation, and NICU medication guidelines. A neonatal dosing chart and intubation/sedation guidelines appear on the inside covers.

Comprehensive Therapeutic Programs for Musculoskeletal Disorders is focused on the effective use of comprehensive therapeutic programs for the treatment of common musculoskeletal disorders encountered by physicians.

Completely revised new editions of the market-leading Chemistry textbooks for HL and SL, written for the new 2014 Science IB Diploma curriculum. Now with an accompanying four-year student access to an enhanced eText, containing simulations, animations, quizzes, worked solutions, videos and much more. The enhanced eText is also available to buy separately and works on desktops and tablets - click here to watch a video to learn more. Follows the organizational structure of the new Chemistry guide, with a focus on the Essential Ideas, Understanding, Applications & Skills for complete syllabus-matching. Written by the highly experienced IB author team of Catrin Brown and Mike Ford, with additional e-features by Richard Thornley and David Moore, you can be confident that you and your students have all the resources you will need for the new Chemistry curriculum. Features: Nature of Science and TOK boxes throughout the text ensure an embedding of these core considerations and promote concept-based learning. Applications of the subject through everyday examples are described in utilization boxes, as well as brief descriptions of related industries, to help highlight the relevance and context of what is being learned. Differentiation is offered in the Challenge Yourself exercises and activities, along with guidance and support for laboratory work on the page and online. Exam-style assessment opportunities are provided from real past papers, along with hints for success in the exams, and guidance on how to avoid common pitfalls. Clear links are made to the Learner profile and the IB core values. Table of Contents: Stoichiometric Relationships Atomic Structure Periodicity Chemical Bonding and Structure Energetics/Thermochemistry Chemical Kinetics Equilibrium Acids and Bases Redox Processes Organic Chemistry Measurement and Data Processing Option A: Materials Option B: Biochemistry Option C: Energy Option D: Medicinal Chemistry

Acland's Video Atlas of Human Anatomy uses fresh, unembalmed specimens that retain the color, texture, mobility--and beauty--of the living human body. A concise synchronized narration runs throughout the program. As each new structure is shown, its name appears on the screen. There is a self-testing feature at the end of each section.

Designed in a concise, easy-to-read style for a wide variety of medical occupations, the Rehab Clinical Pocket Guide is the ideal, handy reference for rehabilitation professionals and other health providers. Divided into four sections that cover inpatient care, clinical strategies, outpatient care, and additional diagnostics and therapeutics, this is the first book of its kind to contain all of the relevant clinical information needed on the rehabilitation unit, including topics such as medication dosing, consultant recommendations, specific rehabilitation goals and treatments, and even billing details for various diagnoses. The Rehab Clinical Pocket Guide offers all the clinical material needed to properly treat patients and excel in the field of physical medicine and rehabilitation and will prove an indispensable resource for therapists, nutritionists, medical students, and physicians alike.

Featured as a single volume, this is a comprehensive guide to possible nerve entrapment syndromes and their management. Each chapter covers a single nerve, or group of closely related nerves, and goes over the clinical presentation, anatomy, physical exam, differential diagnosis, contributing factors, injection techniques, neurolytic/surgical techniques, treatments of perpetuating factors, and complications. Nerve entrapments can occur throughout the body and cause headaches, chest pain, abdominal pain, pelvic pain, low back pain, and upper and lower extremity pain. As an example, one of the most common forms of nerve entrapment syndrome, Carpal Tunnel Syndrome, affects roughly 1 in 20 people in the United States, and is only one of several types of entrapment syndromes possible for the median nerve. Chapters are also extensively illustrated and include 3D anatomical images. The additional online material enhances the book with more than 50 videos - at least 2 for each nerve. This enables readers to easily navigate the book. In addition to a conventional index it includes a "Pain Problems Index" for searching by symptom. Peripheral Nerve Entrapments: Clinical Diagnosis and Management is a long-needed resource for pain physicians, emergency room physicians, and neurologists.

This book has been written to summarise the available knowledge regarding transcutaneous bilirubinometry, the first technique that allows a completely non-invasive measurement of a clinical variable. This technique led to important changes in the management of neonatal jaundice, the most common clinical condition of new-born infants world-wide. Transcutaneous bilirubinometry has its roots in the old observation that yellow skin colour is due to the deposition of bilirubin, a chromophore molecule. More recently, transcutaneous bilirubinometry has involved many disciplines; and accordingly, this book has contributions from physicists, biologists, paediatric dermatologists and neonatologists who have clinical research expertise in the field of neonatal hyperbilirubinemia. We hope that this book may prompt the advancement of research that will answer the as-yet unanswered questions, improve the reliability and usefulness of transcutaneous bilirubinometry, and respond to the clinical needs of our little patients.

AAP Textbook of pediatric Care: Tools for Practice is a comprehensive resource of tools to use in general pediatric practice. A stand-alone volume or as a companion to AAP Textbook of Pediatric Care, a comprehensive and innovative pediatric textbook based on Hoekelman's Primary Pediatric Care, this all-new book focuses on the core components of pediatric care including: *Engaging patients and family (educational tools, behavior modification support) * Decision support for clinicians in the form of 1) assessment/screening tools and 2) guideline tools (such as decision charts, automated entry sets, etc) * Enhancing coordination of care in the practice and in the community * Public health advocacy

Defines Carpal Tunnel Syndrome (CTS) and nerve compression syndrome. Shows the Carpal Tunnel and cross sections of a normal wrist and one with CTS. Causes, risk factors, symptoms are listed. Management techniques and healthy lifestyle changes are also covered.
