One of a range of very similar W series compacts announced in early 2008, the DSC-W130 is a basic but nicely put together 8.1 megapixel metal-bodied job with a useful 32-128mm (equiv.) 4x zoom and 2.5" screen. The almost identical DSC-W120 (which has a 7.2 megapixel sensor) did very well in our December 2008 budget camera group test. (April 2009)

This book is a complete guide to the Sony Cyber-shot DSC-RX10 IV camera. With this book, author Alexander S. White provides users of the RX10 IV with a manual covering all aspects of the camera's operation. Using a tutorial-like approach, the book shows beginning and intermediate photographers how to accomplish things with the RX10 IV, and explains when and why to use the camera's many features. The book provides details about the camera's shooting modes as well as its menu options for shooting, playback, setup, video, Wi-Fi, and special effects. The book covers all features of the RX10 IV that are new for this model, including its enhanced focusing system with phase detection autofocus; its ability to use a touch screen for focusing and enlarging images in some situations; and a variety of new or enhanced menu options. The book includes more than 500 color photographs that illustrate the camera's controls, display screens, and menus. The images include photographs taken using the RX10 IV's Scene mode, with settings optimized for subjects such as landscapes, sunsets, portraits, and action shots; and its Creative Style and Picture Effect menu options, with settings that alter the appearance of images. The book provides concise introductions to topics such as street photography and infrared photography, and explains how to use the camera's Wi-Fi and Bluetooth features to transfer images to a smartphone or tablet, to control the camera from such a device, and to add location information to images. The book includes a full discussion of the video features of the RX10 IV, which can shoot HD and 4K (ultra-HD) movies, with manual control of exposure and focus during recording. The book explains the camera's numerous features for professional-level videography, including Picture Profiles that allow adjustment of settings such as gamma curve, black level, knee, and detail. The book describes steps for recording 4K video to an external video recorder using the "clean" video output from the camera's HDMI port. In three appendices, the book discusses accessories for the RX10 IV, including cases, power sources, remote controls, microphones and external flash units, and includes a list of websites and other resources for further information. The book includes an appendix with "quick tips" on how to take advantage of the camera's features in the most efficient ways possible. This guide to the RX10 IV includes a detailed index, so the reader can quickly locate information about any particular feature or aspect of the camera.

Dennis Ahrholdt untersucht mit dem Partial-Least-Squares-Verfahren, wie sich die Vertrauensausbildung – als zentrale Antezedenz der Kaufabsicht – positiv im E-Commerce beeinflussen lässt. Die Ergebnisse können als Entscheidungsgrundlage für Investitionen zur Steigerung der Conversion-Rate dienen.

The story of the Phantom of the Opera, a half-crazed musician hiding in the labyrinth of the famous Paris Opera House and creating a number of strange and mysterious events to further the career of a beautiful young singer, is today regarded as one of the most famous of all horror stories: widely mentioned in the same breath as Frankenstein and Dracula. Yet the fame of this novel is based almost entirely on the various film versions, while the original book has been largely ignored and is rarely in print. An Accelerated Reader® Title

Drawing on his vast knowledge and direct experience of most of the key events in astronomy and space exploration during this century, Patrick Moore takes a sideways look at the historical reports and contemporary thought behind a wide range of astronomical topics. The Wandering Astronomer presents his personal accounts of the towering characters of 20th-century astronomy, intriguing facts about puzzling astronomical phenomena, and amusing stories about the quirkier side of astronomy and space exploration. This collection of essays covers everything from the case of vanishing planets to UFOs over Selsey. Entertaining and informative, it will be enjoyable reading for both seasoned and amateur astronomers as well as general science readers. About the Author Author and broadcaster Patrick Moore is a lunar specialist who makes observations from his home in Selsey on most clear nights. He has written more than 100 books, and for the past 43 years he has presented BBC TV's Sky at Night program without missing a single episode. Moore served in the RAF during WWII and has been involved in astronomy since he was a boy. In 1967 he was awarded the OBE for his services to astronomy, and in 1988 he received the CBE. He also recently received a knighthood in the New Years Honours list.
