Micro-Hydro Design Manual has grown from Intermediate Technology's field experiences with micro-hydro installations and covers operation and maintenance, commissioning, electrical power, induction generators, electronic controllers, management, and energy surveys.There is an increasing need in many countries for power supplies to rural areas, partly to support industries, and partly to provide illumination at night. Government authorities are faced with the very high costs of extending electricity grids. Often micro-hydro provides an economic alternative to the grid. This is because independentmicro-hydro schemes save on the cost of grid transmission lines, and because grid extension schemes often have very expensive equipment and staff costs. In contrast, micro-hydro schemes can be designed and built by local staff andsmaller organizations following less strict regulations and using 'off-the-shelf' components or locally made machinery.

Presents more than 150 recipes for a range of healthful dishes, in a cookbook that features information on the art of healthy eating.

Qt is one of the most influential graphical toolkits for the Linux operating system and is quickly being adopted on other platforms (Windows, Mac OS) as well. It is necessary to learn for all Linux programmers. This book takes the reader step by step through the complexities of Qt, laying the groundwork that allows the reader to make the step from novice to professional. This book is full of real world examples that can be quickly integrated into a developer's project. While the reader is assumed to be a beginner at Qt development, they are required to have a working knowledge of C++ programming.

After the Moonwalk is a tale of love - as such, a story about desire and definition; conquest, image and illusion; surrender and elegance; freedom; memory and trespass. A lounge, a boudoir, a loft and its window of one thousand tinted tiles, form part of the backdrop for the unlikely cast: Marie-Antoinette, Scheherezade, Achilles, Elvis Blue, and York. A bibliophilic visitor flounders about, from hotel room to the streets, from time to time, unidentified. There are pasts and revelation; there is a romantic triangle or two, but the geometry is suspect.

Preceded by: 2013 physician coding exam review / Carol J. Buck. 2013 ed. c2013.

Restaurant owner Lillian manages an unexpected challenge while sharing her days with a circle of friends and regulars, including ritual-performing accountant Al, heartbroken chef Chloe, and unobtrusive giant Finnegan.

Collects four novels written by the twentieth-century American novelist, including "My Home is Far Away," "The Locusts Have No King," "The Wicked Pavilion," and "The Golden Hour."

Alex Eviston has been monitoring 1989 for over five years. Her job as a U.S. Temporal Inspector is to report any aberrations in history. But she wakes up one morning to find time has shifted. The Germans manipulated the past so that World War II ended in their favor and America is under Nazi control. Now Alex must do more than monitor time, she has to correct history. But she's being hunted by Nazis where ever she goes. She'll have to make friends in odd places and find strength within herself if she's to win the war and make sure that the government of the people, by the people, and for the people, shall not perish from the earth. Will time run out?
