The Complete History of American Film Criticism is a chronicle of the lives and work of the most influential film critics of the past 100 years. From the first movie review in the New York Times in 1896 through the Silent Era, the pre- and postwar years, the Film Generation of the 1960s, the Golden Age of the 1970s, and into the 21st century, critics have educated generations of discriminating moviegoers on the differences between good films and bad. They call attention to great directors, cinematographers, production designers, screenwriters, and actors, and shed light on their artistic visions and storytelling sensibilities. People interested in what the great film critics had to say have usually been shortchanged as to their backgrounds, and just why they are qualified to sit in judgment. Using mini-biographies, placed within a chronological framework, The Complete History of American Film Criticism is the biography of a profession whose cultural impact has left an

This comprehensive study examines the case of AM stereo and subsequent technologies to demonstrate the FCC's evolution from stern to reluctant regulator. It also discusses emerging technologies, such as digital audio broadcasting, and their impact on the evolution of broadcast regulation. In the 1980s the FCC deregulated TV and radio, electing to set only technical operating parameters and allowing legal operation of any system that meets those minimal standards. Huff argues that this approach is likely to influence regulatory approaches to other new developments in broadcast technologies.
