Meet the needs of all students with an engaging narrative, high-interest graphics, and outstanding teacher support.

Teaching for Democracy in an Age of Economic Disparity addresses the intersections between democratic education and economic inequality in American society. Drawing upon well-established theoretical constructs in the literature on democratic citizenship as well as recent events, this volume outlines the ways in which students can not only be educated about democracy, but become actively engaged in the social issues of their time. The collection begins with an examination of how the confluence of capitalism and education have problematized the current model of democratic education, before transitioning into discussions of how teachers can confront economic disparity both economically and civically in the classroom. The authors then introduce a variety of ways in which teachers can engage and empower students' civic action at all grade levels. As a final component, the volume explores new avenues for civic action, including the use of social media for democratic engagement in schools and opportunities for critical reflection and cross-cultural dialogue. This book is a valuable resource for both scholars interested in the research on democratic education and practicing teachers wishing to turn their students into critical, active citizens.

The host of the award-winning humorous news program offers tongue-in-cheek insight into American democracy with coverage of such topics as the republican qualities of ancient Rome, the antics of our nation's founders, and the ludicrous nature of today's media.

In Teaching Democracy, Walter Parker makes a unique and thoughtful contribution to the hot debate between proponents of multicultural education and those who favor a cultural literacy approach. Parker conclusively demonstrates that educating for democratic citizenship in a multicultural society includes a fundamental respect for diversity. This scholarly yet accessible work: Bridges the widening gap between multicultural education and civic education. Provides powerful teaching strategies that educators can use to draw children creatively and productively into a way of life that protects and nurtures cultural pluralism and racial equity. Explains the unity – diversity confusion that is found in popular media as well as in multicultural – and citizenship – education initiatives. Defines deliberative discussion and explores its promise as the centerpiece of democratic education in schools, both elementary and secondary. “ At a moment in time when our connection to the nation seems superficial and jingoistic, Walter Parker offers us a vehicle to reach our ideal of deliberative, committed civic participation for every citizen. This book explores the hard work of citizen-making in a diverse and complex society where individual and group interests often are in conflict. Parker makes us realize that in a democracy ‘ public ’ is not a dirty word and schooling should not be punishment. ” —Gloria Ladson – Billings, University of Wisconsin, Madison “ This book deals in an engaging and thought-provoking way with both social realities and democratic possibilities—exactly what I try to do in my classroom. ” —Wendy Ewbank, teacher, Seattle Girls' School

Contemporary society encounters profound economical, socio-ecological and political crises challenging the democratic foundation of our societies. This book addresses the potentials and challenges for Action Research supporting democratic alternatives. It offers a broad spectrum of examples from Scandinavian Action Research showing different openings towards democratic development. The book's first part contributes with a wide range of examples such as Action Research in relation to the Triple Helix/ Mode II contexts, to design as a democratic process, to renewal of welfare work and public institutions, to innovation policies combining Action Research with gender science. In the second part of the book epistemological and ontological dimensions of Action Research are discussed addressing questions of validity criteria related to Action Research, the transformation of knowledge institutions and the specific character of creativity in Action Research. The book offers a basis for theoretical as well as practical oriented discussions and critical reflections within the field of Action Research and related research orientations, involving a wide range of actors.
