Each no. represents the results of the FDA research programs for half of the fiscal year.

This book includes the extended and revised versions of a set of selected papers from the First NAFOSTED Conference on Information and Computer Science (NICS-2014), held at Le Quy Don Technical Academy, Hanoi, Vietnam from

File Type PDF Technical Publications Le Computing For Engineering

13/Mar./2014 to 14/Mar./2014. The conference was co-organized by The National Foundation for Science and Technology Development (NAFOSTED) and Le Quy Don Technical Academy. The purpose of the NICS conference series is to promote scientific publications in the country and to provide a platform for high quality academic exchange among scientists in the fields of computer science, information and communication. The conference includes five tracks, namely "Computer Science", "Artificial Intelligence", "Network Systems", "Software Engineering", and "Information Systems". The papers in this book are among the best contributions at NICS-2014 taken into account the quality of their presentation at the conference and the recommendation of the two experts in the extra round of independent review.

File Type PDF Technical Publications Le Computing For Engineering

This book is concerned with linear and nonlinear transformations of digitized images and patterns. Transformation models include linear, quadratic, cubic, bilinear, biquadratic, bicubic, Coons model and other nonlinear forms such as harmonic, projective, and perspective transformations. Discrete techniques have been developed to realize both forward and inverse

File Type PDF Technical Publications Le Computing For Engineering

transformations. The latter can be applied to normalize distorted images and to enhance the pattern recognition process. Efficient algorithms such as the splitting-shooting methods and splitting-integrating methods have been developed and analysed in this book for the first time. Graphical examples are given and compared with existing algorithms. This book is of interest to researchers in the areas of pattern recognition, character recognition, image processing, computer vision, computer graphics and other related fields.
