Packed with examples, advice, and tips, the first book devoted entirely to teaching and documenting Userland Frontier teaches developers how to use Frontier's pre-written scripts to improve their Internet site, automate repetitive processes, and more. Original. (Intermediate).

Apple TV is an amazing media player that has been developed and marketed by Apple Inc. The service is used to connect users to digital content from many sources and stream this to their television screens. The service is also capable of receiving digital content from the different iOS apps through the AirPlay feature or directly from the iTunes Store. Content can also be received from Netflix, Now TV, Hulu Plus, YouTube and Vevo. It can also receive content from the major American sporting leagues and can be linked with Siri to allow users to live stream the events they would like to see.

FIREARMS GUIDE 4th EDITION Five products on one DVD every shooter must have: Firearms Guide is the world's most extensive firearms, ammo and air guns reference guide and gun schematics library. It is a must have for anyone with an interest in firearms, air guns, ammunition, hunting and shooting, both for professionals and hobbyists. It is the ultimate tool to search, find, identify and research modern and historic guns. Our database of 57,000 guns and ammo from 630 manufacturers worldwide and Over 4,300 gun schematics with parts lists from 360 manufacturers is so extensive, we couldn't fit it in a book, so we put it on a double-layer DVD for your computer! Even though it is on DVD, Firearms Guide does not require any installation on the user's computer, it starts automatically when inserted, so it's really not software but a gun reference guide readable on PC. Using the Firearms Guide saves a lot of time and money for gun enthusiasts. Instead of buying several publications and surfing for hours on the internet from one manufacturer's website to another, by searching the Firearms Guide's database of 57,000 models from 630 manufacturers from

This book gathers the proceedings of the 6th International Conference on Frontier Computing, held in Osaka, Japan on July 12–14, 2017, and provides comprehensive coverage of the latest advances and trends in information technology, science and engineering. It addresses a number of broad themes, including communication networks, business intelligence and knowledge management, web intelligence, and related fields that inspire the development of information technology. The respective contributions cover a wide range of topics: database and data mining, networking and communications, web and internet of things, embedded systems, soft computing, social network analysis, security and privacy, optical communication, and ubiquitous/pervasive computing. Many of the papers outline promising future research directions, and the book will benefit students, researchers and professionals alike. Further, it offers a useful reference guide for newcomers to the field.
